About the Project:

The build site is a 1.3 acre wooded lot and will be the future site of a single-family home with 4 bedrooms, 2 bathrooms and full basement. The house will be a two story colonial-style with 1560 square feet of living space. Once completed, a local family will enjoy living in a safe, decent and affordable home. Expected single-family home build completion date is August 2022.

The Town of Sturbridge through the Community Preservation Fund Program has provided critical funds for this home build. Without their support this wouldn’t be possible.

Partner Families

We use three criteria to select families for our home build program:
1) Need for adequate shelter
2) Ability to pay a monthly mortgage
3) Willingness to partner with Habitat

These qualifications ensure that families are eligible to receive affordable housing per our guidelines, have a strong desire to work for their goal, and will have the ability to pay for their home over a 25 or 30 year mortgage.

Sweat Equity

Habitat builds homes with families, not for them. Partner families invest 400-500 hours building their own home or volunteering on another Habitat project.

How You Can Get Involved

• Make a donation by visiting www.habitatmwwg.org. Click the Orange Donate Button and direct your gift to the Sturbridge Build Site.
• Make a Gift-In-Kind donation of building materials, labor, or services. Gift-in-Kinds are critical to the success of our affordable home builds, saving us thousands of dollars in expenses. Please consider making a gift-in-kind donation!
• Form or join a community group that looks for ways to support the Sturbridge build.

Building Strength, Stability, and Self-Reliance through Shelter

Habitat for Humanity MetroWest/Greater Worcester builds and sells homes to local families in need of affordable housing using volunteer labor and donated materials.

A Habitat home is a strong foundation for a family, an opportunity for them to build a better life. Better, affordable living conditions lead to financial stability, improved health, and the ability to make good choices for the future.

With a decent place to live and an affordable mortgage, homeowners have more money left over to pay for essentials such as healthy food, medicine, transportation, and to save for education. With your financial support, your time, and your voice, you will help build the strength, stability and self-reliance that families gain through living in of a safe and affordable home. Through shelter, we empower.
